SEMEN \$25 CERTIFICATES \$40

- Hawkeye was the \$43,000 top-selling bull in our 2014 sale.
- Hawkeye is one of the most complete semi-proven bulls of the breed, with EPDs backed by significant progeny genomic testing. No other semi-proven bull in the breed can meet or exceed his

- phenomenal Docility and Ribeye EPD combination!
- Both the top-selling bull and the top-selling heifer in our 2016 sale were sired by Hawkeye. Thirteen Hawkeye sons averaged \$7923. There were numerous standouts in this calf crop, and Hawkeye heifers were Landi's favorite sire group.
- Hawkeye sired the #1 adjusted weaning weight female of the 2015 Hoover crop as well as two others among the top 10 WW heifers.
- Hawkeye is backed by 11 generations of Blackcap Ellston females. He had a BW 65 lbs., WW 844 lbs., WR 111, YW 1505 lbs., YR 110, IMF ratio 109, and a 19.1" ribeye, ratio 119!
- Hawkeye is a thick, stout made bull who sires added frame. He excels for body depth and rib shape. His tremendous muscle comes from both sides of the pedigree.
- Hawkeye's dam is a clean fronted, beautifully made CC&7 female with a nice udder and ideal teat size. She records 4-100 BWR and 4-104 WR. She is the herd's 4th top ribeye ratio cow.
- Grandam G278 produced the #1 adjusted WW bull in our fall 2014 crop that sold for \$25,500. Another son fetched \$17,000 at auction. G278 is a maternal sister to the dam of Hoover No Doubt.
- Owned with Three Trees Ranch, Sharpsburg, GA, and Basin Angus, Joliet, MT.

- Hoover No Doubt is the \$67,500 top-selling bull in our 89-year history! Carson Moneo of Peak Dot Ranch reports about No Doubt this past fall, "He did a good job breeding and actually gained weight doing it. His calves are doing awesome and should be exciting to market this coming spring."
- No Doubt was a hunk that turned in an adjusted 1540 pound yearling weight, ratio 113 to be the #1 adjusted yearling weight bull in our sale! He also scanned a 3.91 IMF, ratio 108, and tied as the top scanning ribeye bull (among 81 yearlings) with a 17.3"

- ribeye, ratio 114! No Doubt is a superb disposition bull that has the style and eye appeal everyone likes. He is exceptionally stout, and definitely puts meat and muscle in his calves. No Doubt had superior foot shape when he sold, and his first calves appear to be good footed at this time.
- We are very pleased with No Doubt's first calf crop weaned in the fall of 2016 – calves are stout, loaded with muscle, and show extra rib and capacity. Roger Sosa of Alta Genetics says, "No Doubt is a true breeding bull. His calves in several herds look really good."
- Donor dam J2 was the lead-off, \$20,000 top-selling open heifer from our 2011 auction. She was one of the most beautiful females we have ever produced and is a 10th generation Hoover Angus bred, born, and raised Blackcap Ellston female.
- J2 was the 4th top weaning weight heifer calf of her crop at 755 pounds, WR 123. She went on to post an 1104 pound yearling weight, YR 116. She scanned a 5.46 IMF, ratio 107 and a 15.4" ribeye, ratio 126.
- When we sold J2, we retained one flush from this female, and had five live calves born. No Doubt's 4 sisters had an average 774 pound weaning weight. The top one at 850 pounds we believe to be the top adjusted weaning weight ever recorded on a heifer at Hoover Angus!
- Pathfinder grandam D154 is one of our stoutest cows – she is gorgeous! She records 6-110 wean ratio. The \$43,000 Hoover Hawkeye (ORigen, ABS) was produced by a granddaughter of D154.
- Owned with: Alta Genetics, Rocky View County, Alberta; Peak Dot Ranch, Wood Mountain, Saskatchewan; and Diamond J Angus, Mandan, ND.

SEMEN \$25 CERTIFICATES \$35

- ★ Top Cut was the most complete, bigger framed bull we found in 2014, and was selected for \$28,000. We were also attracted to this bull because of his excellent feet and large pelvic area. Top

Cut continues to be an excellent footed bull as he matures. Top Cut's calves are low birth weight and exhibit added frame with a very solid phenotype and structural correctness. Top Cut was our heaviest used sire in our fall 2015 and spring 2016 calf crops. We will have a large selection of sons in our February 7, 2017 auction.

- ★ Top Cut sired the #1 adjusted weaning weight heifer calf of the spring 2016 Hoover calf crop at 827 pounds! His progeny boast and impressive 98 BWR to 101 WR spread. In our fall 2015 crop, a Top Cut daughter was the #1 IMF heifer of the crop, and another heifer was the #1 scanning ribeye heifer of the crop. A Top Cut bull claimed top ribeye honors of the fall 2015 crop.
- ★ Top Cut had solid performance data: BW 80 lbs., WW 795 lbs., WR 105, YW 1429 lbs., YR 106. He scanned a 4.85 IMF, ratio 124 and a 16.5" ribeye, ratio 111. Before we purchased Top Cut, we viewed his dam, a Pathfinder, who records 3-98 BWR and 3-105 WR. She is an excellent footed cow with a nice udder and perfect teat size. Top Cut's grandam has also achieved Pathfinder status.
- ★ Owned with Bruns Angus, Madison, SD.

SEMEN \$25 CERTIFICATES \$25

- ★ Commander sons were the top-selling sire group in the 2016 Hoover Angus sale averaging \$11,469, with four Commander sons over \$10,000! These bulls earned this position as the top-selling group, as they are extremely stout cattle with added frame, muscle, and hind quarter.
- ★ Commander sired the top ratioing sire group in both the bull and heifer calves in our 2015 spring calf crop and repeated that success in the 2016 heifer crop. Commander progeny dominated the tops of the weaning weight charts in the spring 2016 crops, with the #1

and #2 adjusted weaning weight bulls being sired by Commander, as well as three of the top five weaning weight heifers! Commander has certainly earned his WW EPD that stretches above the top 1% of the breed!

- ★ Commander was our \$100,000 selection in the 2014 Connealy Angus Sale. This powerhouse bull was the top selling bull in Connealy's record event. Commander was the top pick among 500+ bulls in Whitman, Nebraska for the Hoover family, after seeing the mothers of their top 5 bull picks in the Connealy offering. Landi notes, "Commander offers an excellent phenotype and thickness with a great set of feet and legs. After viewing his dam that records 4-99 BWR and 4-104 WR, he easily became the bull of choice. His dam is a very easy fleshing, excellent uddered, pretty fronted female."
- ★ Commander overpowered the other bulls in his pen, and posted an impressive 877 pound weaning weight, ratio 119, and a 1514 pound yearling weight, ratio 121. His yearling weight was nearly 100 pounds more than the next highest performing Consensus son! Commander was the 6th heaviest adjusted weaning weight bull among nearly 500 bulls in his calf crop, and had the 2nd highest yearling weight among 368 bulls!
- ★ Although we have successfully calved heifers to Commander, in most herds we will recommend him and his sons for use on cows.
- ★ Owned with KDS Angus, Lenox, IA and Alta Genetics, Rocky View County, Alberta.

- ★ Connealy Impact is a sire that will transmit added frame, length, and excellent foot quality. He puts a pleasing profile in his progeny,

especially for a larger framed, calving ease bull. Impact exhibits muscle in his top, thickness through his rear and has a nice long stride. "Without a doubt, the best bargain in the 2014 Connealy Sale. We have bred many cows and heifers to Impact, because we believe he is a bull that can add value to our herd and our customers' herds," says Landi.

- ★ Impact progeny had a strong showing in our spring 2016 calf crop. An Impact daughter out of a first calf heifer was the #2 adjusted weaning weight heifer at 805 pounds, followed by three other Impact daughters among the top 15 weaning weight heifers. In our fall 2015 calf crop, an Impact son was the #1 adjusted weaning weight bull, and two Impact daughters were the #1 and #2 weaning weight heifers!
- ★ Viewing Impact's dam, we found her to be a very square made, deep bodied, good footed, nice uddered female, and one of the biggest, stoutest cows in the Connealy herd. She has a tremendous progeny record with 7-110 WR and 5-108 YR.
- ★ Impact was one of our most heavily used sires during the 2015-2017 breeding seasons, and many calving ease sons will sell in our February 7, 2017 auction.

- ★ No current sire with Bullseye's accuracy or higher can match or exceed his tremendous Docility EPD!
- ★ Bullseye progeny have been phenomenal growth and power cattle. Starting with his first calf crop in 2013, Bullseye sons were the #1 indexing sire group. They have continued to be top performance cattle in each successive calf crop. The Bullseye progeny have been gentle to handle, and will be a great fit for cattlemen who have used CC&7 genetics and want to continue with excellent disposition bulls.
- ★ A Bullseye son was the #1 adjusted weaning weight bull of the 2015 Hoover Angus crop (non-ET) and was one of five Bullseye

sons in top 15 weaning weight bulls. In the heifer division, three Bullseye heifers were among the top 15 adjusted weaning weight heifers of the crop. Bullseye certainly lives up to his top-of-the-breed growth EPDs!

- ★ Bullseye progeny in our 2014 sale were the hit of the auction, with 20 yearling sons averaging \$10,080! In our 2015 auction, 32 Bullseye sons averaged \$10,609! Bullseye sons are very popular because of their thickness, muscle, and shape that is very evident in Bullseye himself.
- ★ The oldest Bullseye daughters are approaching four years old. Over 320 daughters in 76 herds have an average 102 WR on their progeny. Reports about Bullseye daughters have been excellent - nice udders and great dispositions. We have found our Bullseye daughters to have excellent udder shape and ideal test size.
- ★ Bullseye is one of the few bulls of the breed that sold a significant amount of semen before he came to auction at 14 months of age, selling for \$192,000. Over 2200 progeny have now been recorded through AHIR in 165 herds, giving Bullseye significant accuracy on his tremendous growth genetics.
- ★ Bullseye was the #1 yearling weight and #2 weaning weight bull of the Mogck crop, and scanned the 2nd biggest ribeye and 2nd highest IMF! He aced every challenge that was given to him, earning him the name "Bullseye"! Bullseye is a 6.5 frame bull with an outcross pedigree for much of the breed. He is a very gentle bull to work with.
- ★ Owned with KDS Angus, Lenox, IA; Mogck & Sons, Olivet, SD; and Accelerated Genetics, Baraboo, WI.

HOOVER DAM

Calved
1-25-08

G18

#16124994

[AMF, CAF, DDF, M1F,
NH, OHF]

Hoover Dam has established himself as the all-time semen sales bull ever at ORIGen in his 6½ years of production and has established a brand name sire reputation in the Angus breed for his genetic excellence combining calving ease, muscle, docility and maternal strength.

He is one of the most popular and requested bulls to view at ORIGen as he approaches his 9th birthday. He has remained very sound, attractive and still produces both outstanding semen quality and volume. Outstanding commercial and purebred demand makes him a very popular sire choice.

With 6½ years of semen sales through the ORIGen/ABS marketing programs, Hoover Dam has sold over 175,000 units of semen and has grossed over \$3 million to date. He has forged a national and international legacy for his breeders, Hoover Angus, Ellston, Iowa.

Gary Wall, ORIGen Sales & Marketing Specialist

SEMEN \$26 CERTIFICATES \$40

★ The bull that put Hoover Angus on the map, Hoover Dam has brought success to cattlemen across the country. Hoover Dam has been among the top 15 bulls of the breed the past five years for progeny registrations! He now has over 14,000 progeny through AHIR in over 1450 herds.

★ Hoover Dam has made his mark on the nation's cow herd not by touting a few extreme EPDs, but as being a balanced-trait bull with no caution flags. Hoover Dam semen sales have remained

incredibly strong due to repeat commercial demand – buyers cite his calf crop uniformity and highly productive, functional daughters as their biggest reasons for repeat usage.

★ Hoover Dam's greatest asset is his daughters. They are impeccable uddered females with great manners. Hoover Dam has earned Pathfinder honors.

★ **There is no other non-carrier bull in the breed that can match Hoover Dam's combined Marbling and Ribeye EPDs with his accuracy!** Over 6400 progeny in nearly 700 herds have an average 105 IMF ratio and 101 ribeye ratio. Over 100 carcass progeny have been reported. In the 2011 Midland Bull Test, progeny from multiple herds also topped the test for RFI score, with the average RFI -2.79!

★ The Hoover Dam calves have exceptional thickness, especially for a bull with such a proven low birth weight. They have eye appeal, power and mass in a moderate framed package.

★ Pathfinder dam C124 has an impeccable record of 6-96 BWR, 6-114 WR, 6-106 YR, 37-101 IMF ratio and 37-102 Ribeye ratio. C124's nine sons to come to auction at Hoover Angus have averaged \$13,050 and her four daughters have averaged \$21,075.

★ Owned with A&B Cattle, Bassett, NE; AJC Angus, Baxter, IA; Basin Angus, Hobson, MT; Craigmore Farm, Schomberg, Ontario; Express Ranches, Yukon, OK; EZ Angus Ranch, Porterville, CA; Gary Wall, Billings, MT; Idland Cattle Co., Circle, MT; Sioux Pass Livestock & Grain, Lodge Grass, MT; and Stevenson's Diamond Dot, Hobson, MT.

SEMEN \$30 CERTIFICATES \$40

★ The breed's docility leader now has over 8400 progeny recorded in over 1000 herds. CC&7 was the 4th top sire of the Angus breed for progeny registrations in 2012!

★ The following Hoover-bred bulls in bull studs have CC&7 influence in their pedigrees: Hoover Dam (who has now exceeded CC&7

in number of progeny through AHIR), Hoover No Doubt, Hoover Hawkeye, Hoover Quintain, Hoover Inspiration, Hoover Ambition, Hoover Emperor, Hoover Elation, Hoover Hercules, and Hoover Home Run.

★ CC&7 daughters have nice udders – good udder attachment, level udders, and a small teat size. In the Hoover cow herd, five of the top fifteen indexing cows are sired by CC&7, including the #2 indexing cow of the entire herd! A recent visitor to Hoover Angus that viewed the majority of the spring calving herd stated, "If I were to begin a new herd today, I would use CC&7 as my base."

★ CC&7's disposition is truly second-to-none, and we've coined the phrase the "CC&7 Effect" – when a certain percentage of the animals in a group are sired by CC&7, the temperament of the entire group is calmed. The more restless animals in a group become more docile because of their docile CC&7 contemporaries. This is a testament to CC&7's position as the longest standing top docility Angus bull in America!

★ CC&7 was the #1 adjusted weaning weight bull and top selling bull in the fall 2006 Sydenstricker offering. CC&7 went on to post the top ADG at 3.92 lbs./day, ratio 124, the top Yearling Weight at 1,467 lbs., ratio 121, and the top Ribeye measurement at 17.3" ratio 130.

★ CC&7 will definitely leave a positive, long-lasting imprint in the Hoover cow herd and the herds of our customers!

★ Owned with Sydenstricker Genetics, Mexico, MO.

Basin Lady 183C

SEMEN \$25 CERTIFICATES \$40

- ★ The biggest spread bull in the Hoover herd bull line-up, he is truly the epitome of curve-bending genetics, now backed by significant accuracy! Excitement is a true calving ease bull without sacrificing the traits often lost in typical calving ease cattle.
- ★ In the fall 2013 Hoover calf crop, the top weaning weight bull was sired by Excitement at 870 pounds. The #1 weaning weight heifer was also sired by Excitement, at 804 pounds. Three of the top five

- weaning weight heifers of this crop were sired by Excitement. Each successive calf crop has shown equally impressive weaning results.
- ★ Excitement daughters have very uniform, nice udders with small teat size and good udder attachment. They are moderate sized, efficient females that will be easy fleshing cattle that can stand tougher environments. Their mothering skills are good also. An Excitement daughter is the #1 indexing cow in the entire Hoover herd!
 - ★ Excitement is sound made, clean-fronted, and offers an outcross pedigree to much of the breed. Progeny have excellent muscle, rib, and thickness.
 - ★ Excitement is our most trusted sure-fire calving ease sire. Many heifers have been bred to this bull in the past and we still use him today. Excitement calves out of heifers can come 10-12 days early, with consistently low birth weights. This short gestation has helped keep his BW EPD low and CED high. Excitement cattle are easy to market with their "big spread" EPD traits and sound structure.
 - ★ Excitement died at stud in 2015 and semen is limited in supply. Please contact Hoover Angus for details. Look for his sons Hoover Elation M123 (Select Sires), Hoover Homestead (ORigen), Hoover Hercules (Alta Genetics) and Hoover Explorer (Alta Genetics) to carry on his tradition of excellence!
 - ★ Owned with A&K Farms, Bertrand, NE; Basin Angus Ranch, Joliet, MT; and EZ Angus Ranch, Porterville, CA.

SEMEN \$20 CERTIFICATES \$35

- ★ Elation was the \$25,000 second top-selling bull in our 2014 auction, boasting the 4th top yearling weight of the sale at 1497 lbs. He scanned a 4.73 IMF, ratio 116, ribeye 16.7", ratio 104.

- ★ Elation's first calves were true low birth weight, calving ease calves. A beautiful daughter in his second crop weaned at 765 pounds to be the 10th top weaning weight calf of her crop at Hoover Angus. One of Elation's first daughters to sell was sold in the Double R Angus Dispersal in Wisconsin this fall – a 7 month-old Elation daughter was the co-top selling female at \$15,000!
- ★ Elation is a calving ease deluxe package with a standout phenotype and outcross pedigree for much of the Angus breed. He is deep bodied with good capacity and has a lot of muscle in his rear. He is correct made and moves easy. He's thick, smooth, and attractive.
- ★ Dam K68 was a first calf heifer with Elation, and she now records 4-94 BWR, 4-103 WR and 2-104 YR with a 355 day calving interval. Three full sisters to K68 work in the herd, one has earned Pathfinder honors. A low birth weight, attractive-made full brother to Elation sold in our 2015 auction to Brenner Angus of Colorado for \$9000.
- ★ Pathfinder grandam D58 has served as a donor for us and maintains a perfect 365 day calving interval! Great grandam also earned Pathfinder honors.
- ★ Owned with Select Sires, Plain City, OH.

SEMEN \$30 CERTIFICATES \$40

- ★ The Ribeye king! A significant amount of both ultrasound and carcass progeny has propelled Counselor's Ribeye EPD to the top of the breed, where it dwarfs breed average for sires at +.43! With a very well-balanced set of EPDs, correct structure, and fresh pedigree for many of today's Angus cattle, Counselor has had strong semen sales.
- ★ Further bolstering his popularity is his exceptionally strong showing in the ABS Sire Alliance. In the spring 2015 Sire Alliance data, Counselor ranks in the top 1% for Total Profit!

- ★ Counselor was the \$53,000 third top-selling bull in the 2011 Connealy Angus sale. He had excellent performance data, with an 882 pound weaning weight, ratio 113, 1387 pound yearling weight, ratio 111, 4.00 IMF, ratio 103, and a 16.0" ribeye, ratio 113. A flush brother to Counselor sold the same day to Alta Genetics for \$36,000.

- ★ Counselor is elite calving ease, high growth, and exceptional carcass quality. He is extra long, has a big scrotal, clean sheath, and pounds to push the scales down. His sons are notably big scrotal bulls with tight sheaths. Counselor's donor dam records 3-116 WR and 3-114 YR on her natural calves.
- ★ We appreciate Counselor daughters for their nice, tight udders, fleshing ability, and uniformity. A Counselor daughter raised the 7th top adjusted weaning weight heifer calf of the spring 2015 Hoover Angus crop at 743 pounds.
- ★ Owned with ABS, DeForest, WI.

- ★ Gold Mine was our \$12,000 selection from the 2015 Moore Angus sale in South Dakota. He is a really long-spined, large framed,

correctly made, high performing bull. He is an eye-catching bull with excellent feet quality. We viewed Gold Mine and his dam prior to purchasing the bull.

- ★ Gold Mine weaned at 872 lbs., WR 109, YW 1613 lbs., YR 111, IMF 4.23, ratio 117, and ribeye 14.9," ratio 100.
- ★ As a yearling, Gold Mine was turned out with cows and settled his females in the early part of the breeding season and every single female was pregnant. He is a large scrotal bull that had a 42 cm scrotal at a year of age.
- ★ Gold Mine's first set of calves were definitely a high growth sire group. A standout Gold Mine son (John's favorite bull of our spring 2016 calf crop) was the 4th top weaning weight bull at 896 pounds! A daughter was the 7th top weaning weight heifer at 768 pounds.
- ★ Gold Mine is a son of Moore Gold, who sired the top yearling weight group of bulls as well as the top ADG sire group in the 2015 Moore sale. Gold Mine's dam was a first calf heifer that had twins in 2015. She has a 363 day calving interval.
- ★ Owned with Moore Angus, Artesian, SD.

★ The incredible combination of CC&7 X Gridiron has once again risen to the top! Inspiration is moderate, extremely thick, big topped, wide based, deep ribbed, correct made, and easy going. He was the \$56,000 top-selling bull of our 2013 auction to Alta Genetics.

- ★ As his dam and full sisters have made phenomenal cows, we expect this to be Inspiration's greatest asset yet. Inspiration's daughters have excellent udder structure and moderate size.
- ★ Pathfinder donor dam C164 will be a cow that goes down in the Hoover history books! C164 records 10-107 WR on her natural progeny and a 362 day calving interval! Eleven sons scanned at Hoover Angus have averaged over a 15.7" ribeye! C164 has grossed over \$175,000 in progeny and embryo sales. Eleven sons have averaged \$11,500; three daughters \$14,150.
- ★ At 11 years of age, C164's natural calf weaned at 854 pounds to tie as the 12th top adjusted WW bull calf of his crop!
- ★ Owned with Alta Genetics, Rocky View County, Alberta.

- ★ Emperor is so named to signify the 13 generations of "Empress Ellston" cows that have stood the test of time at Hoover Angus.
- ★ Emperor's calves show tremendous growth. His first crop of daughters were the #1 ratioing sire group at weaning time in

- the Hoover heifer crop! His progeny have added frame, growth, and stretch. Similar to CC&7, the Emperor progeny have good dispositions. Comments from commercial producers who used Emperor comment on the uniformity, growth, and good dispositions.
- ★ Emperor daughters are superior young cows. One weaned the #1 adjusted weaning weight bull calf of the 2016 crop at 928 pounds!
- ★ Emperor was the #1 WW, #1 YW, and 3rd top IMF bull of his crop!
- ★ Pathfinder dam G403's first three progeny were all the #1 adjusted weaning weight bull or heifer calf of their respective crop! G403 now records 5-98 BWR, 5-112 WR, 5-111 YR, 12-108 IMF ratio and 12-100 ribeye ratio! She serves as the herd's 4th top indexing cow and a working donor. She is the dam of Hoover Leadman (Alta Genetics).
- ★ Owned with Genex Cooperative, Shawano, WI.

- ★ Hoover Headliner was the \$30,000 top-selling bull in our 2011 auction selling to Select Sires. He was the thickest bull of the sale and put everything together in a very complete package. He was the #1 ribeye scan bull of the auction with an 18.4" ribeye.

- ★ Headliner calves have exceeded our expectations - they are high growth cattle with muscle, good feet, big scrotals, and good dispositions. They are sound made cattle with a tick more frame.
- ★ C109 has achieved Pathfinder status with 10-97 BWR, 10-109 WR, 9-106 YR, 13-108 Ribeye ratio and a 361 day calving interval. At 12 years of age, C109 weaned a 798 pound heifer calf to be the 3rd top adjusted weaning weight heifer of her crop! C109 serves as the herd's 15th top indexing cow. C109 is a 12th generation Hoover bred-and-owned Blackcap Empress Ellston cow.
- ★ Great grandam J350 made the Pathfinder report at 14 years of age.
- ★ After initially freezing semen, Headliner had an injury to one testicle, which was later removed. Semen is limited in supply.

★ Direct Deposit was our \$37,500 selection in the 2012 Connealy Angus Sale. He was definitely a cattlemen's favorite sale day. His dam is a top producing, bigger framed Onward daughter that records 9-114 WR and 8-113 YR!

★ We continue to be very pleased with his progeny. They are very stout, correct, and easy fleshing. Over 200 weaned progeny through AHIR average a 102 wean ratio, 103 yearling ratio, 101 scrotal ratio and 104 IMF ratio! His daughters in production have very nice udders and average a 102 wean ratio on their progeny. We have used Direct Deposit on many CC&7 daughters, and this appears to be an excellent combination. A Direct Deposit daughter weaned the 10th top weaning weight heifer calf of our 2016 crop.

★ Several visitors to the farm have picked Direct Deposit as one of their favorite sires at Hoover Angus. He is an exciting outcross pedigree for much of the breed, and has been sampled in numerous herds across the Midwest, offering more frame than found in most of the Danny lines.

★ Sizzle was the \$30,000 co-top selling bull of the fall 2015 SydGen Sale. He is a slick haired, deep bodied, level topped bull with excellent scrotal development. He weaned at 768 lbs., WR 108, YW 1501 lbs., YR 110. He is a super long bodied bull to pack in extra pounds, which he has done. He is a superior disposition

bull whose Docility EPD we certainly expect to rise if his progeny exhibit his calm demeanor. We were impressed how Sizzle held his condition during his first summer breeding season.

★ Sizzle's outcross pedigree and EPD package makes him one of the most unique bulls available for AI. He saw both AI and natural service at Hoover Angus in 2016. Sizzle was on display in the SydGen pen at the 2016 National Western Stock Show.

★ Sizzle's dam records 4-108 WR, 3-106 YR, 4-100 IMF ratio and 4-100 ribeye ratio. She has entered the donor program at SydGen. Sizzle's grandam is the dam of ALC Big Eye D09N. Sizzle's sire is a big-spread bull with outstanding carcass merit who was the #1 \$B bull of the 2014 Connealy Angus sale.

★ Owned with Sydenstricker Genetics, Mexico, MO.

★ Chief was selected for natural service use at Hoover Angus, then ½ interest was purchased by Alta Genetics for \$30,000. A standout since he was little, Chief is a stout, powerful, correctly

made Commander son with excellent feet and leg structure. He is a mid-6 frame bull with a superb disposition.

★ Chief had very solid performance data: BW 90 lbs., WW 868 lbs., WR 114, YW 1426 lbs., YR 108, IMF 3.69, ratio 114, ribeye 15.0, ratio 99. He tied as the 3rd top weaning weight bull of his crop!

★ Dam K189 is a big framed, high producing cow with 4-105 WR and 2-109 YR. Her first daughter was the 8th top weaning weight heifer of her crop at 759 pounds! K189's two sons have averaged an 836 pound weaning weight. She is a great cow to work with at calving time, as typical of Journey daughters.

★ Owned with Alta Genetics, Rocky View County, Alberta.

SEMEN \$25 CERTIFICATES \$25

- Hawkeye son with a lot of rear quarter and muscle. Cyclone exhibits excellent feet and should be safe for use on heifers. We would expect Cyclone to improve dispositions.
- ★ Stephanie Hattenbuehler of Diamond J Angus reports, "The most improved bull this summer is Cyclone! He looks like a two year old. He's filling out real nice and has perfect feet and phenotype!"
- ★ Cyclone's dam is an extremely laid back cow. Her first son was the 7th top-selling bull in our 2015 auction at \$14,500. L168 records 3-96 BWR, 3-108 WR, 2-106 YR, and 2-121 IMF ratio. With her 351 day calving interval, she might just make the 2017 Pathfinder report!
- ★ Pathfinder grandam J46 has been a superior cow who has brought 8 progeny to auction averaging \$10,875!
- ★ Owned with Alta Genetics, Rocky View County, Alberta and Diamond J Angus Ranch, Mandan, ND.

- family that has already produced a "Great One," Hoover Dam.
- ★ Ambition has tremendous length, power, mass, and added frame. He is a bigger boned bull that will sire excellent performance and unmatched docility. Ambition was the \$30,000 second top-selling bull in our 2016 auction.
- ★ Donor dam L5 had stunning individual performance: BW 74 lbs., WW 779 lbs., WR 116, YW 1160 lbs., YR 114, IMF 7.05, ratio 119, ribeye 14.6", ratio 119. Her ribeye scan was nearly 5" above breed average for heifers! L5 was the #1 adjusted WW, #1 YW and 5th top scanning ribeye heifer of her crop!
- ★ Pathfinder and donor grandam G366 is truly one of our all-time great cows. Her 7 progeny have averaged \$12,000.
- ★ Owned with Alta Genetics, Rocky View County, Alberta.

- ★ Dam L299 records 3-104 WR.
- ★ Maternal grandsire Carbon Copy is a standout CC&7 son noted for his exceptional length of body and growth.
- ★ Carbon Copy daughters have become excellent young cows and have beautiful udders. Daughters in production average a 103 WR on their progeny! A Carbon Copy daughter raised the #1 adjusted weaning weight heifer calf of the spring 2015 Hoover calf crop.
- ★ Great grandam C109, a Pathfinder and Hoover Angus donor, has been one of the greatest cows in our history. She is the dam of Hoover Headliner, and her 7 sons have grossed \$75,500! She is the herd's 15th top indexing cow! At 12 years of age, she is still going strong.
- ★ Owned with Alta Genetics, Rocky View County, Alberta.

lots of mating potential. Prior to when Linebacker was selected, we noted his very calm disposition. He continues to stay very gentle, and is has grown into a mature herd bull look.

- ★ Linebacker was born at 75 pounds, weaned at 856 pounds, WR 114, and turned in a 1506 pound yearling weight, ratio 113. He aced his ultrasound scan with a 5.65 IMF, ratio 130, 13.8" ribeye, ratio 105, and rib and rump fat ratios of 77 and 75, respectively. Linebacker's dam and grandam have both earned Pathfinder status.
- ★ Females will carry Linebacker's service in our February 7, 2017 production sale. His best son to-date that weaned at 811 pounds will be in our 2017 sale.
- ★ Owned with Bruns Angus, Madison, SD.

superior foot quality bull. He is still going strong at 9 years of age, and wows visitors with his size and volume.

- ★ Weaning at 857 pounds to be the top indexing calf of his crop at SydGen, Journey went on to post a 1393 lb. yearling weight and scan a 16.8" ribeye.
- ★ Journey's progeny average a 106 IMF ratio and 100 ribeye ratio.
- ★ Journey's dam, Basin Lucy 1736, has some of the highest growth EPDs among current dams in America! She traces back to the famous Basin Lucy 178E cow who has given rise to one of the most powerful and popular cow families in the breed today. 1736 has been a donor at SydGen.
- ★ Owned with Sydenstricker Genetics, Mexico, MO.

★ 38 Special was our pick of the bulls in the record 2016 Baldridge Bros. Sale, where 38 Special and his 6 flush brothers averaged \$58,928. 38 Special was the 3rd top-selling bull of the event at \$100,000, and is co-owned with Alta Genetics. Sire Commando produced 20 sons in the Baldridge sale that averaged \$35,275. 38 Special's dam has produced a total of 23 sons selling in the

38 Special's individual performance data:
 BW 83 pounds
 WW 859 lbs., WR 111
 YW 1523 lbs., YR 112
 Adjusted yearling scrotal 39.53 cm
 IMF 6.99, ratio 104
 RE 14.6", ratio 97
 Yearling HH 53", Frame Score 7.0

last two Baldridge sales to average \$29,445. There is power in the blood!

- ★ 38 Special was definitely the power, high performance bull of his flush and a standout with added frame in the Baldridge offering. He is a unique blend of his sire's calving ease and his dam's big frame and power. As a 5 year-old cow, she boasts eight EPDs/indexes in or above the top 1% of the breed. We viewed 38 Special's dam before purchasing the bull, a cow Jud says is one of his very best, serving as one of his top donors.
- ★ 38 Special offers an outcross pedigree to Hoover Angus genetics, and we expect him to sire great outcross bulls for our customers. He is one of the most complete bulls we have evaluated in recent years. 38 Special's first calves will arrive in early January, 2017 at Hoover Angus.
- ★ Owned with Baldridge Bros., North Platte, NE and Alta Genetics, Rocky View County, Alberta.
