SEMEN \$30 CERTIFICATES \$25

- ★ 38 Special was our pick of the bulls in the record 2016 Baldrige Bros. Sale, where 38 Special and his 6 flush brothers averaged \$58,928. 38 Special was the 3rd top-selling bull of the event at \$100,000, and is co-owned with Alta Genetics. Sire Commando produced 20 sons in the 2016 Baldrige sale that averaged \$35,275. 38 Special's dam has produced a total of 43 sons selling in the last three Baldrige sales to average \$38,285! There is power in the blood!
- ★ 38 Special was definitely the power, high performance bull of his flush and a standout with added frame in the Baldrige offering. He is a unique blend of his sire's calving ease and his dam's big frame and power.
- ★ Viewing the Y69 donor cow prior to purchasing 38 Special, we found her to be everything Jud promised. She is likely the most influential cow in Baldrige Bros. history, and is having an impact on the nation's cow herd. By the time her sons have been used heavily, Y69 will be remembered as one of the breed's great ones!
- ★ 38 Special's first calf crop was weaned in August, 2017 at Hoover Angus. They are the largest sire group, and hands down many of the finest calves that will be offered in our February 6, 2018 auction. A 38 Special heifer calf was the #1 adjusted weaning weight heifer of the crop at 872 pounds, which is the heaviest adjusted weaning weight of any female in Hoover history! Another heifer was the 4th top weaning weight heifer. 38 Special sons were the 2nd and 4th top weaning weight bull calves. 38 Special calves have added frame, length, and muscle. After his first crop, 38 Special has 49 progeny at 103 wean ratio.
- ★ Heifers were calved successfully to 38 Special, and therefore we used him much heavier on heifers during the spring and fall 2017 breeding seasons. Many bred heifers carry his service in our February sale.

★ Top Cut serves as one of our most complete herd sires. His progeny have been in high demand. A total of 29 Top Cut sons in our 2017 auction averaged over \$8400 to be the top selling sire group. Two Top Cut sons were selected by bull studs, Hoover Cut

- ★ Above P427 and Hoover Top Notch P409.
- ★ Top Cut's calves are low birth weight with a very solid phenotype and structural correctness.
- ★ Top Cut sired the #1 adjusted weaning weight heifer calf of the spring 2016 Hoover calf crop at 827 pounds!
- ★ Top Cut is a deep, soggy bull that serviced cows as a yearling and held his flesh well for a yearling bull.
- ★ Top Cut was our \$28,000 selection from the 2014 Bruns sale, where he was the second top-selling bull. He was the most complete, bigger framed bull we saw in 2014 and boasted a large pelvic area. Top Cut is an excellent footed bull as he matures. After a tremendous showing of progeny, Top Cut was leased to ST Genetics where he has been a volume semen sales bull for many ST reps.
- ★ Top Cut had solid performance data: BW 80 lbs., WW 795 lbs., WR 105, YW 1429 lbs., YR 106. He scanned a 4.85 IMF, ratio 124 and a 16.5" ribeye, ratio 111. Before we purchased Top Cut, we viewed his dam, a Pathfinder, who records 3-98 BWR and 3-105 WR. She is an excellent footed cow with a nice udder and perfect teat size.
- ★ Owned with Bruns Angus, Madison, SD.

- ★ Top Notch was the \$33,000 top-selling bull in our 2017 auction. He came to auction with a phenomenal set of credentials, and a phenotype to match. Top Notch will add some guts & girth to his daughters – save every one he makes!
- ★ Top Notch was a member of the "Fab Five," the set of 5 flush brothers that averaged \$23,800! Top Notch was noted by many as the neatest phenotype bull of the flush and the #1 adjusted

- ★ yearling weight ET bull of his crop.
- ★ Donor dam L5 is one of our favorites, and is now owned with Baldrige Bros. She is a slick haired, great disposition, big bodied, superior uddered female. L5 comes from the same cow family that brought us Hoover Dam, and this Erica cow family has put a total of 7 bulls in bull studs in recent years, including a \$39,000 full brother to L5, Hoover Counselor N29.
- ★ A maternal brother to Top Notch, Hoover Ambition, was the \$30,000 selection of Alta Genetics.
- ★ L5 records 3-105 WR on her natural progeny and 12-102 IMF ratio and 12-103 ribeye ratio. L5 recently weaned an 842 pound heifer calf at Baldriges to ratio 105 in a tough group of donor cows' calves!
- ★ L5 was the standout of her crop – she was the #1 WW, #1 YW heifer at 779 lbs., WR 116, YW 1160 lbs., YR 114. She scanned a 7.05 IMF, ratio 119, 14.6" ribeye, ratio 119.
- ★ Pathfinder grandam G366 is truly one of the most incredible females we have ever bred. She has grossed \$158,000 in sales and records 8-98 BWR and 8-107 WR with a 365 day calving interval, which includes stealing flushes four different years! For three consecutive years, G366 weaned the #1 adjusted weaning weight bull or heifer calf of the Hoover crop!
- ★ Owned with Baldrige Bros., North Platte, NE; Ray Sikes, Pritchett, CO; and Select Sires, Plain City, OH.

- ★ No Doubt is the \$67,500 top-selling bull in our 90-year history!
- ★ No Doubt was a hunk that turned in an adjusted 1540 pound yearling weight, ratio 113 to be the #1 adjusted yearling weight bull in our sale! He also scanned a 3.91 IMF, ratio 108, and tied as the top scanning ribeye bull (among 81 yearlings) with a 17.3" ribeye, ratio 114! No Doubt is a superb disposition bull that has the style and eye appeal everyone likes. He is exceptionally stout,

and definitely puts meat and muscle in his calves. No Doubt calves have been very sound footed.

- ★ With two calf crops now weaned, we can honestly say his calves easily rise to the top. In his second crop at Hoover Angus, a flush of No Doubt sons and daughters is the highlight of the crop! A No Doubt son was the #1 adjusted weaning weight bull calf among 160 herd mates of the 2017 Hoover crop at 911 pounds! No Doubt daughters were the #2 and #3 adjusted weaning weight heifers. No Doubt's calves are stout and loaded with muscle.
- ★ Donor dam J2 was the lead-off, \$20,000 top-selling open heifer from our 2011 auction selling to KDS Angus. She was one of the most beautiful females we have ever produced. J2 is a 10th generation Hoover Angus bred, born, and raised Blackcap Ellston female.
- ★ J2 was the 4th top weaning weight heifer calf of her crop at 755 pounds, WR 123. She went on to post an 1104 pound yearling weight, YR 116. She scanned a 5.46 IMF, ratio 107 and a 15.4" ribeye (5.7" above breed average), ratio 126.
- ★ When we sold J2, we retained one flush from this female, and had five live calves born in 2014. Only one was a bull, No Doubt. One sister was the #1 adjusted WW heifer of her crop at 850 pounds.
- ★ Owned with Alta Genetics, Rocky View County, AB; Diamond J Angus Ranch, Mandan, ND; and Peak Dot Ranch, Wood Mountain, SK.

SEMEN \$26 CERTIFICATES \$40

- ★ The bull that put Hoover Angus on the map! Hoover Dam has made his mark on the nation's cow herd not by touting a few extreme EPDs, but as a balanced-trait bull without caution flags.
- ★ Hoover Dam is the all-time semen sales bull ever at ORiGen, and at 10 years of age, is still one of the most popular and requested bulls

to view at ORiGen. He has sold over 212,000 units of semen and has grossed over \$4.4 million. Hoover Dam has truly established a brand name reputation for calving ease, muscle, docility, and maternal strength.

- ★ In years 2012-2015, Hoover Dam was among the top 10 bulls of the Angus breed for registrations. He was only one of four bulls in the breed that was on the "Top 10" list each of those four years, and the ONLY bull of these four bred in a herd that registers less than 1000 head per year. In 2015, Hoover Dam earned elite Pathfinder honors during his first year of eligibility. He now has over 15,000 progeny through AHIR in over 1500 herds.
- ★ Hoover Dam is a renowned sire for producing superior females. They are highly productive, functional, impeccable uddered females. Many cattlemen view this as Hoover Dam's greatest asset. Hoover Dam daughters weaned the 2nd and 4th top weaning weight bull calves of the spring 2017 Hoover crop among 160 contemporaries!
- ★ The Hoover Dam calves have exceptional thickness, especially for a bull with such a proven low birth weight. They have eye appeal, power and mass in a moderate framed package. Even more exciting is Hoover Dam's successes in carcass and feed efficiency traits. His carcass EPDs have risen significantly after calves have been ultrasounded in herds across the country. Over 6800 progeny in over 700 herds have an average 105 IMF ratio and 101 ribeye ratio. Over 100 carcass progeny have also been reported.
- ★ Pathfinder dam C124 has an impeccable record of 6-96 BWR, 6-114 WR, 6-106 YR, 40-101 IMF ratio and 40-102 Ribeye ratio. C124's nine sons to come to auction at Hoover Angus have averaged \$13,050 and her eight daughters have averaged \$13,475.
- ★ Owned with A&B Cattle, Bassett, NE; AJC Angus, Baxter, IA; Basin Angus, Joliet, MT; Craigmore Farm, Schomberg, Ontario; Express Ranches, Yukon, OK; EZ Angus Ranch, Porterville, CA; Gary Wall, Billings, MT; Island Cattle Co., Circle, MT; Sioux Pass Livestock & Grain, Lodge Grass, MT; and Stevenson's Diamond Dot, Hobson, MT.

★ Elation was the \$25,000 second top-selling bull in our 2014 auction selling to Select Sires. He is a calving ease deluxe package with a standout phenotype and outcross pedigree for much of the Angus breed. Dr. Aaron Arnett who selected Elation states, "We selected Hoover Elation because he offers outcross calving ease genetics with no sacrifices in performance and phenotype and we like doing

Hoover Elation S46

Elation Son

Sells February 6, 2018

Hoover Elation R55

\$11,500 Elation Son

business with reputable breeders that can be trusted to submit accurate records and stand behind their product."

- ★ Elation's calves are true low birth weight, calving ease calves. A beautiful daughter in his second crop weaned at 765 pounds to be the 10th top weaning weight calf of her crop at Hoover Angus. One of Elation's first daughters to sell was sold in the Double R Angus Dispersal in Wisconsin – a 7 month-old Elation daughter was the co-top selling female at \$15,000!
- ★ Elation is deep bodied with good capacity and has a lot of muscle in his rear. He is correct made and moves easy. He's thick, smooth, and attractive. His Docility EPD at the top of the breed is very telling of the bull's excellent disposition.
- ★ Dam K68 was a first calf heifer with Elation, and she now records 5-96 BWR, 5-104 WR and 3-102 YR with a 355 day calving interval. Three full sisters to K68 work in the herd; one has earned Pathfinder honors. A low birth weight, attractive-made full brother to Elation sold in our 2015 auction to Brenner Angus of Colorado for \$9000.
- ★ Pathfinder grandam D58 has served as a donor for us and maintains a perfect 365 day calving interval! Great grandam also earned Pathfinder honors.
- ★ Owned with Select Sires, Plain City, OH.

Sells February 6, 2018

super long bodied bull to pack in extra pounds, which he has done. He is a superior disposition bull whose Docility EPD we certainly expect to rise. We were impressed how Sizzle held his condition during his first summer breeding season.

- ★ Sizzle's outcross pedigree and EPD package makes him a unique find. He sees both AI and natural service duties at Hoover Angus. Sizzle was on display in the SydGen pen at the 2016 National Western Stock Show.
- ★ Sizzle's first calves were weaned in the fall of 2017, and there are definitely some standouts that will come to auction in our February 6, 2018 auction. A Sizzle son out of a first calf heifer was the 9th top weaning weight bull at 861 pounds. A standout heifer calf daughter was the 10th top weaning weight heifer.
- ★ Sizzle's dam that we viewed the morning of the SydGen sale records 4-108 WR and 3-106 YR. She has entered the donor program at SydGen. Sizzle's grandam is the dam of ALC Big Eye D09N. Sizzle's sire, Cool, is a big-spread bull with outstanding carcass merit who was the #1 \$B bull of the 2014 Connealy Angus sale.
- ★ Owned with Sydenstricker Genetics, Mexico, MO.

- ★ Commander sons were the top-selling sire group in the 2016 Hoover Angus sale averaging \$11,469! These bulls earned this position as the top-selling group, as they are extremely stout cattle with added frame, muscle, and hind quarter.
- ★ Commander sired the top ratioing sire group in both the bull and

heifer calves in our 2015 spring calf crop and repeated that success in the 2016 heifer crop. Commander progeny dominated the tops of the weaning weight charts in the spring 2016 crops, with the #1 and #2 adjusted weaning weight bulls being sired by Commander, as well as three of the top five weaning weight heifers!

- ★ Commander was the \$100,000 top-selling bull in Connealy's 2014 sale. Commander was the top pick among 500+ bulls in Whitman, Nebraska for the Hoover family, after seeing the mothers of their top 5 bull picks in the Connealy offering. Landi notes, "Commander offers an excellent phenotype and thickness. After viewing his dam that records 5-96 BWR and 5-103 WR, he easily became the bull of choice. His dam is a very easy fleshing, excellent uddered, pretty fronted female."
- ★ Commander was a powerhouse with a WW of 877 lbs., WR 119, YW 1514 lbs., YR 121. Commander was the 6th heaviest adjusted weaning weight bull among nearly 500 bulls in his calf crop, and had the 2nd highest yearling weight among 368 bulls!
- ★ Although we have successfully calved heifers to Commander, in most herds we will recommend him and his sons for use on cows.
- ★ Owned with Alta Genetics, Rocky View County, Alberta and KDS Angus, Lenox, IA.

- ★ Hawkeye is one of the most complete semi-proven bulls of the breed, with one of the most balanced EPD packages available. His EPDs are backed by significant progeny genomic testing. He was the \$43,000 top-selling bull in our 2014 sale.
- ★ Hawkeye's first calf crop that sold in our 2016 sale was unstoppable. The top-selling bull and heifer were sired by Hawkeye, and 13 sons averaged \$7923. There were numerous standouts in this calf crop

including the #1 adjusted weaning weight heifer, and Hawkeye heifers were Landi's favorite sire group.

- ★ Hawkeye's first daughters in production are very pretty females with excellent udder structure.
- ★ Hawkeye is backed by 11 generations of Blackcap Ellston females and had a BW 65 lbs., WW 844 lbs., WR 111, YW 1,505 lbs., YR 110, IMF 4.45, ratio 109 and RE 19.1, ratio 119. Hawkeye was the 5th top WW, 3rd top YW, #1 scanning ribeye bull of his crop!
- ★ Hawkeye is a thick, stout made bull. He excels for body depth and rib shape. His tremendous muscle comes from both sides of the pedigree, and is evident in the three generations of Blackcap Ellston females that precede him.
- ★ Hawkeye's dam is a clean fronted, beautifully made CC&7 female with a nice udder and ideal teat size. She records 5-102 WR, 4-105 YR, 4-119 IMF ratio, and 4-111 ribeye ratio with an exceptional 355 day calving interval. She is the herd's 11th top IMF ratio cow and ties as the herd's 4th top ribeye ratio cow! K97's 2016 son was 5th top selling bull of our 2017 auction at \$18,500.
- ★ Grandam G278 produced the #1 adjusted WW bull in our fall 2014 crop that sold for \$25,500 in our 2016 auction. G278 is a maternal sister to the dam of Hoover No Doubt.
- ★ Owned with Three Trees Ranch, Sharpsburg, GA and Basin Angus Ranch, Joliet, MT.

- ★ Connealy Impact is a sire that will transmit added frame, length, and excellent foot quality. He puts a pleasing profile in his progeny, especially for a larger framed, calving ease bull. Impact exhibits

Miss Blackcap Ellston P408
\$7000 Impact Daughter

Hoover Impact R171
\$9000 Impact Son

muscle in his top, thickness through his rear and has a nice long stride. "Without a doubt, the best bargain in the 2014 Connealy Sale. We have bred many cows and heifers to Impact, because we believe he is a bull that can add value to our herd and our customers' herds," says Landi.

- ★ Impact sure has the ability to put pounds in his progeny, as numerous calves in recent calf crops have done a tremendous job. In our spring 2017 calf crop, an Impact son was the 5th top weaning weight bull and an Impact daughter was the 5th top weaning weight heifer! In our fall 2016 calf crop, the #1 and #2 adjusted weaning weight bull calves were both sired by Impact! Finally, in our spring 2016 calf crop, an Impact daughter out of a first calf heifer was the #2 adjusted weaning weight heifer at 805 pounds, followed by three other Impact daughters among the top 15 weaning weight heifers.
- ★ Viewing Impact's dam prior to the sale, we found her to be a very square made, deep bodied, good footed, nice uddered female, and one of the biggest, stoutest cows in the Connealy herd. She has a tremendous progeny record with 8-108 WR, and 6-109 YR.
- ★ Impact has been one of our most heavily used sires and many progeny will sell in our February 6, 2018 auction.

- ★ Repeat buyers at Hoover Angus come for docility, added frame, and high growth. Bullseye progeny hit the target! No current sire with Bullseye's accuracy or higher can match or exceed his tremendous Docility EPD!
- ★ Bullseye progeny have been phenomenal growth and power cattle. Starting with his first calf crop in 2013, Bullseye sons were the #1 indexing sire group. They have continued to be top performance

Maid of Ellston R334
Bullseye Daughter
Sells February 6, 2017

Hoover Quintain
\$30,000 Bullseye Son

cattle in each successive calf crop. Bullseye's growth EPDs have stayed high with over 2500 progeny reported in nearly 200 herds.

- ★ Bullseye progeny have been well accepted at auction. As an example, 20 yearling sons averaged \$10,080 in our 2014 auction. In our 2015 auction, 32 Bullseye sons averaged \$10,609! Bullseye sons are very popular because of their thickness, muscle, and shape. For those frustrated with Angus genetics becoming too low of birth weight, too frail made and small, look to Bullseye to put the beef, growth, and frame back in cattle.
- ★ The oldest Bullseye daughters are now five years old. Currently, over 500 daughters in over 100 herds have an average 102 WR on their progeny.
- ★ At Hoover Angus, we know that "Good bulls don't cost, good bulls pay," and we partnered with KDS Angus and Accelerated Genetics to bid against several of the largest and most prestigious Angus breeders in the country to have the winning bid at \$192,000 when Bullseye sold. He is one of the few young bulls of the breed that sold a significant amount of semen before he came to auction.
- ★ Bullseye was the #1 yearling weight and #2 weaning weight bull of the Mogck crop, and scanned the 2nd biggest ribeye and 2nd highest IMF! He aced every challenge that was given to him, earning him the name "Bullseye"! He is a powerhouse individual with tremendous growth traits and a 6.5 frame. He is very gentle.
- ★ Owned with KDS Angus, Lenox, IA and Mogck & Sons, Olivet, SD.

- ★ Gold Mine was our \$12,000 selection from the 2015 Moore Angus sale in South Dakota. He is a really long-spined, large framed, correctly made, high performing bull. He is an eye-catching bull

Hoover Gold Mine R44
\$6000 Gold Mine Son

Miss Erica Ellston R290
Gold Mine Daughter
Sells February 6, 2017

with excellent foot quality. We viewed Gold Mine and his dam prior to purchasing the bull.

- ★ Gold Mine weaned at 872 lbs., WR 109, YW 1613 lbs., YR 111, IMF 4.23, ratio 117, and ribeye 14.9" ratio 100.
- ★ As a yearling, Gold Mine was turned out with cows and settled his females in the early part of the breeding season and every single female was pregnant. He is a large scrotal bull that had a 42 cm scrotal at a year of age.
- ★ Gold Mine's calves are definitely high performing. A standout Gold Mine son (John's favorite bull of our spring 2016 calf crop) was the 4th top weaning weight bull at 896 pounds! A daughter was the 7th top weaning weight heifer at 768 pounds. Gold Mine progeny have added style and eye appeal. His daughters are deep, broody, and have the look of making beautiful daughters.
- ★ Gold Mine is a son of Moore Gold, who sired the top yearling weight group of bulls as well as the top ADG sire group in the 2015 Moore sale. Gold Mine's dam was a first calf heifer that had twins in 2015 and now records 3-104 WR and 2-109 YR with a 363 day calving interval.
- ★ Owned with Moore Angus, Artesian, SD.

- ★ The biggest spread bull in the Hoover herd bull line-up, this bull is truly the epitome of curve-bending genetics! Excitement is a true calving ease bull without sacrificing the traits often lost in typical calving ease cattle. He is sound made, clean fronted, and tight sheathed.
- ★ Excitement daughters have very uniform, nice udders with small teat size and good udder attachment. They are moderate sized, efficient females that will be easy fleshing cattle that can stand tougher environments. Their mothering skills are good also. They are ideal females! An Excitement daughter raised the #1 adjusted

Hoover Excitement R1
\$14,500 Excitement Son

Hoover Excitement N427
\$21,000 Excitement Son

weaning weight heifer calf of the spring 2016 and 2017 Hoover crop! This Excitement daughter is the #1 indexing cow in the entire Hoover herd.

- ★ Excitement produced the 2nd top selling bull in our 2014 auction at \$25,000 selling to Select Sires, Hoover Elation M123.
- ★ In the fall 2013 Hoover calf crop, the top weaning weight bull was sired by Excitement at 870 pounds. The #1 weaning weight heifer was also sired by Excitement, at 804 pounds. Three of the top five weaning weight heifers of this crop were sired by Excitement. Each successive calf crop has shown equally impressive weaning results.
- ★ Excitement is a trusted sure-fire calving ease sire. Excitement calves out of heifers can come 10-12 days early, with consistently low birth weights. This short gestation help keeps his BW EPD low and CED high. Excitement cattle are easy to market with their "big spread" EPD traits and sound structure.
- ★ An Excitement son, Hoover Electrify, produced the 2nd top weaning weight bull of our spring 2013 crop. This bull was the 3rd top selling bull of our 2014 sale at \$24,000. Another Electrify son was the 10th top weaning weight bull of our spring 2016 crop! Purchasers of Excitement sons in several states have been well satisfied with how their Excitement sons held up in their first year of service and how their progeny have performed.
- ★ Excitement died at stud in 2015 and semen is limited in supply. Look for his sons Elation, Hercules, and Explorer to carry on his tradition of excellence!
- ★ Owned by A&K Farms, Bertrand, NE; Basin Angus Ranch, Joliet, MT; and EZ Angus Ranch, Porterville, CA.

Inspiration's dam and full sisters have made phenomenal cows, and now his young daughters are doing the same. Inspiration's Docility EPD at the top of the breed is very accurate.

- ★ Inspiration is moderate, extremely thick, big topped, wide based, deep ribbed, correct made, and easy going. Inspiration was the \$56,000 top-selling bull of our 2013 auction.
- ★ Pathfinder donor dam C164 records 10-107 WR and a 362 day calving interval, which includes stealing flushes five times! Fourteen sons scanned at Hoover Angus have averaged over a 15.5" ribeye! C164 has grossed over \$175,000 in progeny and embryo sales.
- ★ Owned with Alta Genetics, Rocky View County, Alberta.

- ★ Donor dam J54 is a super low birth weight cow with a beautiful udder. J54 records 4-87 BWR, 4-101 WR, 13-110 IMF ratio and 13-100 ribeye ratio.
- ★ J54 is a full sister to former Hoover herd sire H&K Friction G290, who was the 9th top weaning weight bull of his crop. G290 produced some excellent calves, adding style and eye appeal to his progeny.
- ★ Pathfinder and donor grandam is approaching 14 years old and still going strong! In 2016, she weaned an 833 pound bull calf to tie as the 15th top weaning weight bull calf of the crop! C344 has been flushed three different years, yet maintains an incredible 361 day calving interval on her 12 natural progeny! Even better, C344 has beautiful udder shape, attachment, and teat size. C344 records 12-98 BWR, 12-107 WR, and 10-104 YR.

lots of mating potential. Prior to when Linebacker was selected, we noted his very calm disposition. He continues to stay very gentle, and is has grown into a mature herd bull look. Visitors to Hoover Angus are quick to ask who Linebacker is because of his impressive look.

- ★ Linebacker was born at 75 pounds, weaned at 856 pounds, WR 114, and turned in a 1506 pound yearling weight, ratio 113. He aced his ultrasound scan with a 5.65 IMF, ratio 130, 13.8" ribeye, ratio 105, and rib and rump fat ratios of 77 and 75, respectively. Linebacker's dam and grandam have both earned Pathfinder status.
- ★ Females carry Linebacker's service in our February sale.
- ★ Owned with Bruns Angus, Madison, SD.

is a superior foot quality bull. He is still services cows at nearly 10 years of age, and wows visitors with his size and volume.

- ★ Weaning at 857 pounds to be the top indexing calf of his crop at SydGen, Journey went on to post a 1393 lb. yearling weight and scan a 16.8" ribeye. He was selected to add frame size and growth.
- ★ Journey's progeny average a 106 IMF ratio and 100 ribeye ratio. Journey daughters have produced some outstanding progeny in recent years, such as the Hoover Chief bull.
- ★ Journey's dam traces back to the famous Basin Lucy 178E cow who has given rise to one of the most powerful and popular cow families in the breed today.
- ★ Owned with Sydenstricker Genetics, Mexico, MO.

- ★ Delmonico is a proud, easy fleshing, long bodied, soft made, deep ribbed bull with balanced performance and end-product merit. He is an attractive bull with excellent structure, hoof shape and depth of heel. We purchased Delmonico as a coming three year-old, and one of his greatest assets were his feet that had never been trimmed. His added muscle expression, depth of rib and extra volume distinguishes him among the current field of Discovery sons.
- ★ Like his dam, Delmonico is very docile and easy to work with.

Delmonico, November 2017

Delmonico's Feet, November 2017

Monarch Blackbird 1104M
Dam of Delmonico

MBG Cinnamon Ruby 1714
*Delmonico Daughter
 Owned by MB Genetics*

- ★ Delmonico's dam, 1104M, is a gorgeous mother cow with a beautiful balanced udder with small teats. She has raised three natural heifer calves that are retained in the herd at MB Genetics with an adjusted average weaning weight slightly over 700 pounds. She has produced three ET bull calves with an adjusted average weaning weight of 753 pounds. 1104M scanned an individual 6.7% IMF and her first daughter by Connealy Confidence scanned over 8.6% IMF to give Delmonico a family heritage of added carcass merit.
- ★ Delmonico's individual performance mirrors his genetic evaluation arriving with an adjusted birth weight of 83 pounds, weaning at an adjusted weight of 864 pounds and reaching an adjusted yearling weight of 1,632 pounds. He was used as a long yearling on virgin heifers, with his first very docile progeny born unassisted and vigorous. Birth weights were in the very acceptable 80 pound range followed by his own rapid growth rate.
- ★ Owned with MB Genetics, Rio, WI.
