*Hoover Family*

Back row: Landi and Andrew  
Front row: Gwen, Joy, David and Ty

//

The Hoover Family homesteaded in Southern Iowa in 1856; the purebred Angus herd was founded in 1928 by Walt Hoover. Hoover Angus has passed through the female side of the Hoover family since that time, with second generation John & Barb (Hoover) Kiburz, third generation David & Joy (Kiburz) McFarland, and fourth generation Andrew & Landi (McFarland) Livingston. Now in our 170th year of family farming and 98th consecutive year of Angus cattle, we strive to create genetics with an optimum balance of phenotype, maternal, performance, and EPD strength through the art and science of a disciplined breeding program.

• Legitimate. That's his name, that's what he is, and that's the program he comes from! As more breeders see his progeny and especially this first set of daughters, Legitimate is rising in popularity. He will certainly be a cornerstone of Hoover Angus genetics for years to come.

- Legitimate's second calves have now been weaned, and they are flat out getting the job done! They are thick, stout, correct-structured, and just-right framed. We will have a large sire group of sons and daughters in our February 3, 2026 sale.
- The #1 and #2 top weaning weight heifers of the 2024 Hoover crop as well as 2 of the top 5 weaning weight bulls of the crop (non-ET) were sired by Legitimate! In our spring 2025 crop, Legitimate sired the #1 weaning weight heifer and 4 of the top 10 WW heifers.
- Progeny of Legitimate through AHIR show an average 100 BWR, 102 WR, 103 YR, 107 IMF ratio and 102 ribeye ratio!
- Legitimate's first daughters that are approaching their first calving are gorgeous females – deep and broody, yet feminine enough with a nice Angus head. They look like ideal young cows in the making! Bred heifer daughters in our February 3, 2026 sale are the highlight of visitors to the farm.
- Legitimate's Pathfinder grandam and Pathfinder great grandam each have 10 calves on record, signaling strong longevity, fertility, and productivity - traits hard to measure by EPDs, but foundational to our commercial cattlemen customers!
- TJ Gabriel of Deep Creek Angus Ranch states, "From the time he hit the ground, we knew he had the potential to be great. Extreme length, depth of flank, extra chest floor, and he stands on a great foot. He rose to the top and earned 'Lot 1' status in the 2023 Deep Creek sale, where he garnered \$105,000 with progressive cattlemen winning the bid as well as being the contending bidders."
- In a contemporary group of over 100 bulls, Legitimate weaned at 931 pounds and went on to post a 1493 pound yearling weight, ratio 123. He had a nice ultrasound scan of a 4.36 IMF, ratio 118, ribeye 14.4", ratio 116. His scrotal was an optimum 38 cm.
- Legitimate's dam is a beautiful cow approaching six years of age that is easy keeping, broody, nice uddered, and has a bright future ahead of her! She has settled first service AI 4 out of 5 years and records a tremendous average 116 wean ratio on her progeny!
- Legitimate's Pathfinder grandmother settled first service AI 9 out of 10 years, and Legitimate's great grandmother also settled first service AI 9 out of 10 years! The documented fertility, longevity, and

• "He's the one!" says Joy after seeing this calm temperament, 5 year-old bull in person. Landi relates, "He's just what we need to maintain and even increase frame size while keeping other traits in check. We are thrilled about the foot quality this bull exhibits at his age, as well as the ability to slick off early in the season. Galactic will be perfect for our commercial customers looking to sell calves by the pound and retain replacement females."

• After weaning his first calves at Hoover Angus in the fall of 2025, we certainly appreciate them for their added frame, length and growth. Five of the top 10 weaning weight bulls (non-ET) were sired by Galactic as well as 5 of the top 10 heifers!

- Galactic combines an appropriate level of calving ease and growth along with a reasonable amount of milk to be able to produce tight-uddered, long-lasting females that can excel in fescue country.
- The first Galactic progeny at Hoover Angus will sell February 3, 2026.
- Owned with High Point Genetics, Osceola, IA; Vollmer Angus, Wing, ND; and Sitz Angus, Harrison, MT.

**MOHLEN JILT 6900**  
DAM OF FORCE

• Force is a Magnum son and comes from the famous Jilt cow family – his grandam and great grandam are both Pathfinder donors and are regarded as the two most influential cows in the Mohnen program! His dam records 3-84 birth weight ratio, 3-105 wean ratio, and 2-105 yearling ratio with a 362-day calving interval – she may be looking at Pathfinder honors in 2026! Her most recent calf is once again at the top of the crop. Force's dam entered the Mohnen donor program in 2025.

- Semen was used in multiple states last year, and heifers will carry his service in our February 3, 2026, sale. Force was used both AI and natural service at Hoover Angus in the spring and fall of 2025.
- Owned with Mohnen Angus, White Lake, SD.

General Lee has been used heavily at Hoover Angus, and his progeny have been very well accepted at auction. Our customers appreciate the growth and phenotype of these cattle. With moderate birth weights, General Lee progeny have superior weaning growth but won't get too big as mature adults. Sons

- are ideal for our customers selling their calves by the pound at weaning and retaining replacement daughters.
- General Lee's oldest daughters calved for the first time in the spring of 2025, and they were well-mannered, beautiful uddered, easy-fleshing females. These females are nicely made and broody. As a prediction of daughters' staying power, General Lee is the #1 Hoover herd sire with daughters in production for the new Functional Longevity EPD at +1.22.
- The #1 adjusted weaning weight bull calf of our spring 2023 crop was by General Lee and then again in our 2025 crop! General Lee had a dominant presence in the heaviest calves of our 2024 crop also. Sons and daughters will sell in our February 3, 2026, production sale. The General Lee bred heifers in this offering are gorgeous!
- General Lee was a classy, super easy-going bull that met with our approval after seeing him and his mother in person. His feet were some of the best we evaluated in the spring of 2022! He's long, thick and sound with the rib capacity that makes beautiful, productive daughters.
- The General Lee sire group represents what is often lost as our breed chases extreme EPDs – problem-free cattle that are easy to look at and have a breed character Angus head.
- General Lee is a big testicle bull that froze semen quickly at CGS as a yearling bull. He weaned at 801 pounds, WR 110, YW 1438 lbs., YR 106, and he scanned over 1.1" of ribeye per hundred pounds of body weight! In our fall 2024 crop, General Lee sired the #1 ribeye scanning female and #1 ribeye scanning bull!
- General Lee lives up to his Docility EPD near the top of the breed, and we use him to continue the tradition of disposition excellence at Hoover Angus! Also important to Hoover Angus customers, he has a tight sheath and slick hair coat for working on tough fescue pastures.
- General Lee's dam, which comes from the most famous cow line in Mohnen history, has a very small teat size, tight udder attachment, and is a massive-bodied, ideal Angus female.

• Empire is our "go to" heifer bull! Volume semen discounts are available for commercial heifer projects! He is an ultra calving ease bull that boasts CED and CEM EPDs in the top percentiles of the breed! Better yet, these cattle have explosive weaning growth. In our 2023 spring crop, Empire

sired the #1 weaning weight heifer and the #2 weaning weight bull! In our fall 2023 crop, Empire had the #1 weaning weight bull of the entire crop at 875 pounds (an ET calf) and among the non-ET calves, he sired the heaviest two bulls! In 2025, 3 of the top 5 weaning weight bulls in our crop were sired by Empire!

- One of the best things about Empire's progeny is their growth curve that gives our customers accelerated early growth with a respectable mature size, so Empire's daughters won't be too big and harsh on feed resources! An ideal scenario for commercial cattlemen selling their calves by the pound at weaning and retaining replacement daughters!
- Our 2025 sale was a great day for Empire, as the top-selling bull at \$29,000 was an Empire son as well as the 7th top-selling bull. The top-selling bred heifer was a \$15,000 Empire daughter. Our February 3, 2026, sale will showcase many Empire sons and daughters as well as bred heifers carrying his service.
- For those interested in the new Functional Longevity EPD (FL), Empire is the third highest Hoover-owned sire with a +1.19 FL EPD.
- Empire isn't your typical "calving ease" bull lacking muscle – he scanned a 15.1" ribeye to have 1.17" of ribeye per hundred pounds of body weight! His carcass EPDs are favorable for producers feeding out their calves and selling on a grade and yield grid.
- Empire daughters in production have picture-perfect udders and look like their udders will be very long-lasting with as nice of udder suspension and teat size as what they have. These young cows were easy fleshing and had great breed-back rates as wet two-year-olds.
- As a yearling bull, Empire froze semen at CGS, then serviced heifers at Mogck & Sons, then came to Hoover Angus for natural service duties. The same plan for 2022-2024 unfolded, with thousands of units of semen being sold throughout the Midwest, including numerous repeat customers who have now used Empire for several years.
- Empire's dam is an 11th generation Eraline female to be bred, born and raised by Mogck & Sons. Empire had a light birth weight of 62

DAM OF PROMISE

Hoover Angus customers. Promise calves will be the largest sire group in our 2026 crop.

- Promise offers an outcross pedigree to the vast majority of the Angus breed today and bends the growth curve from CED and BW to WW as good as any other Prolific son in the breed! He offers the highest Functional Longevity EPD at +1.23 of any Hoover-owned herd sire! For those at elevation, Promise offers a very favorable PAP projection.
- Promise froze semen on his first collection at CGS and quickly put up several hundred units of semen!
- Landi viewed the dam of Promise prior to the sale and found her to be a superior uddered 6-year-old raising another excellent calf. Her progeny average a 103 weaning ratio and 101 yearling ratio with a 369-day calving interval.
- Promise serviced heifers at Hoover Angus in the summer of 2025 and is now at Select Sires. Heifers will sell bred to Promise in our February 3, 2026, production sale.
- Owned with Mogck & Sons, Olivet, SD and Select Sires, Plain City, OH.

SELLS FEBRUARY 3, 2026

ability to sire heavy weaning weights (excellent for our customers who sell their calves by the pound at weaning), yet modest mature weights, whereby keeping cow size in check and not getting too extreme and harsh on feed resources. This is shown by Mercury's WW and YW EPDs in the top 10-15%

- of the breed, yet his Mature Weight EPD in the bottom 75% of the breed, which indicates smaller mature size.
- Our first crop of Mercury calves are definitely stout and will sell in our February 3, 2026 sale, several of which are photo features.
- Mercury's muscle is evident not only by viewing the bull, but his 17.7" ribeye gives him an off-the-charts 1.44" of ribeye per hundred pounds of body weight! Mercury also offers higher Marbling potential for our customers feeding out their calves and selling them on a grid.
- Sire Basin Safe Deposit was the 2020 Montana Performance Bull Co-op top seller that offers a unique combination of foot quality, carcass merit, and curve bending spread with outstanding phenotype.
- Mercury's dam records 3-99 birth weight ratio, 3-105 wean ratio and 1-105 yearling ratio with a perfect 365 day calving interval.
- Owned with Bonnie Acres Farm, IA; Cedar Top Ranch, NE; Brice Conner, IA; Les Craft, MT; Diamond Peak Cattle, CO; GW Genetics, IA; High Point Genetics, IA; Nold Family Angus, SD; Spokane Hutterian Brethren, WA; and Windmill Angus Ranch, NE.

**SEMEN: \$25 CERTIFICATES: \$40**

- Trophyclass was brought to Hoover Angus as the phenotypic standout of Tyler & Meg Scales' 2021 bull crop. His phenomenal producing dam was still going strong at 16 years of age!
- The first Trophyclass daughters came into production in 2025, and they have superior teat size

and shape, a nice temperament, and are motherly young females.

They held their flesh well and are standout females with optimum growth and carcass qualities. Trophyclass daughters have an average 101 wean ratio on their progeny. We expect Trophyclass daughters to leave a legacy for not only phenotype, but fertility, structure, fleshing ability, and the ability to thrive and perform in fescue country in part due to their hair shedding qualities.

- Trophyclass stamps his calves with unprecedented rib shape and adequate frame size. Exceptional Trophyclass sons and daughters will sell in our February 3, 2026 sale.
- Trophyclass is a proud bull that offers excellent structure, a wide stance and chest floor, bold muscle, big testicles and superior foot shape. When I first saw the bull as a yearling, I knew he was the next "great one" for the Hoover program. My decision was solidified when I discovered his dam was in her teens and still going strong!
- Trophyclass' EPDs aren't earth shattering, but more important, they are REALISTIC, BELIEVABLE, and ACHIEVABLE. As our breed constantly chases wild EPDs and outlier marbling genetics, we wanted a bull that hits an "optimal" target for carcass genetics while prioritizing maternal strength, longevity, and superior feet. Trophyclass does that! Better yet, he set the weaning weight record at E L K Angus in a dry year! Trophyclass thrived on the tough sagebrush country at the base of the Bighorn Mountains in Scales' herd that is built around the commercial cattlemen's satisfaction. Trophyclass progeny are expected to work well at elevation as he has one of the best PAP EPDs of any Hoover-owned sire.
- Trophyclass traces back to Walt Hoover's foundational herd sire, the 1936-born Revolution's Bell Boy.
- Jim Stampfel of Pine Coulee Angus, breeder of Trophyclass' dam, has this to say about her, "The 16 year-old Black Annie U7 cow is definitely in the discussion as the best cow to be raised at Pine Coulee. She passes on a ton of muscle and style with very good feet, udder, and excellent fertility. She can travel, she can forage, and her production record is excellent. Lastly, her disposition can't be beat, calm and mature." U7's natural calves average a moderate 96 birth ratio, yet whopping 110 weaning ratio and 108 yearling ratio.

muscle that is not just genomic-based. No Doubt consistently transmits style and eye appeal. No Doubt calves have easily risen to the top in numerous calf crops and have topped both the bull and female division of our sale several years including a daughter at \$36,500 and a son at \$30,000.

- Backed by Bullseye and CC&7 – two of the highest proven bulls for Docility in the history of Docility EPD, the No Doubt progeny are unquestionably breed leaders for this important trait! Daughters in production have a calm demeanor that makes them good to work with at calving time.
- No Doubt was a hunk that turned in an adjusted 1540 pound yearling weight, ratio 113 to be the #1 adjusted YW bull in our sale! He also scanned a 108 IMF ratio, and tied as the top scanning ribeye bull (among 81 yearlings) with a 17.3" ribeye, ratio 114!
- Donor dam J2 is a 10th generation Hoover Angus bred, born, and raised Blackcap Ellston female. She was the lead-off, \$20,000 top-selling open heifer from our 2011 auction. J2 hit her financial stride at 8 years of age, generating nearly a quarter million dollars in revenue in a 12 month period! In 2021, at 11 years of age, J2 produced the \$158,000 top-selling bull at the Midland Bull Test.
- Three of No Doubt's flush sisters have earned Pathfinder status.
- Owned with Alta Genetics, Rocky View County, AB and Spruce Mountain Ranch, Larkspur, CO.

ABOUT IT'S DAM  
HOOVER ANGUS DONOR

big hipped, thick, and has the muscle you would expect from No Doubt. He offers a super calm disposition and excellent feet. About It progeny will be more moderate in frame than No Doubt progeny.

- His dam is a beautiful uddered, feminine cow with a 359 day calving interval. His grandam and great grandam are both Pathfinder donors.
- Grandam N54 is my favorite cow in the herd! By sale time she will be 12 years old and is still going strong with an exceptional udder and feet. N54's fertility was showcased in the perfect 365 day calving interval she had on her first 8 natural calves, despite stealing flushes several years!
- Great grandam G366 is regarded as the best cow in our 98-year history, and her 23 descendants averaged \$10,076 in our 2023 sale! Four of her direct daughters and one son have earned Pathfinder honors.
- Hoover About It has been leased to Jack Laurie of Breeder Genetics in Australia. After viewing the bull in person, Jack stated, "About It stood out to us for his unique ability to be utilized on heifers, without a sacrifice on muscle shape, constitution and structure. A bull we believe offers pedigree diversity, maternal excellence, and is backed by a program with a strong commitment to phenotype recording."
- Owned with Larry & Bill Hohertz, Greenfield, IA.

Athlete exemplifies many of the phenotypic characteristics found in Bonsma's description of cattle in endocrine balance that are highly fertile and productive.

- Athlete is a soft sided, soggy-made, wide topped bull. Athlete progeny have gas in the tank to be high performing calves! His calves exhibit excellent depth of body and rib shape.
- Raml Athlete was the best footed bull we traveled to see in the spring of 2021! His toe shape is ideal and heel depth is appropriate. We purchased him to continue our quest to improve foot quality, structure, longevity and disposition excellence! Grant Raml was not joking when he said this bull is laid back – he and his progeny have good temperaments!
- Athlete weaned at 881 pounds, WR 121, YW 1415 lbs., YR 112, and had an adjusted 39.36 cm scrotal. His dam posts a whopping 4-116 WR and 4-110 YR with well below average birth weight ratios on her natural progeny! She has become a donor for the Ramls.
- Athlete gets turned out at Hoover Angus each year and at 6 years of age is still sound and going strong. We welcome you to Hoover Angus to view Athlete and any other herd sires we have on the farm. Our doors are always open for our customers to evaluate the cattle in person before making purchasing decisions of genetics.
- Owned with Raml Cattle, Goodwin, SD.

YON SARAH D668  
DAM OF YON STRONG

YON SALUDA  
MATERNAL BROTHER TO STRONG

Yon Strong was our selection and 2nd top-selling bull of the Fall 2024 Yon Sale. Named Yon Strong not only in honor of his sire, Armstrong, but in regards to the strength and resiliency of the local communities in the East that were hit with the aftermath of Hurricane Helene, as the Yon family was impacted prior to their 2024 sale.

- Dam Yon Sarah D668 has made her mark as one of the most impressive females in Yon history. Her sons include Yon Saluda and Yon Top Cut G730 (both at Select Sires) as well as others in numerous progressive programs across the country.
- This gentle bull had an adjusted weaning weight of 690 pounds with no creep, ratio 109, and a strong yearling weight ratio of 107. He scanned a 3.81 IMF, ratio 106 and a 12.3" ribeye, ratio 105. He is long bodied, sound made, and slick haired to work well in fescue country.
- When Yon Strong arrived, we noticed his super calm demeanor. We had a cow in heat, so within the hour of him arriving from South Carolina, Yon Strong got to breed his first female. This calm bull went right to work and learned how to breed his first cow within 15 minutes. He continues to be a high libido bull.
- Owned with Yon Family Farms, Ridge Spring, SC.

• Optics was one of our largest sire groups in 2022 and 2023, and they have not disappointed yet! These calves were fun to wean, as they showed excellent growth and the added frame and length of body our customers like. If the Angus breed has gotten too small for

ERICA OF ELLSTON B17

8-MONTH-OLD OPTICS DAUGHTER

HOOVER OPTICS B2

\$15,000 OPTICS SON

your liking, check out the Optics progeny!

• Optics sired the #1 adjusted weaning weight bull calf of our 2022 crop at 915 pounds and went on to repeat that honor in our 2024 crop! In our 2023 crop, Optics calves performed well – they dominated the top end of our ET bull calf weaning weights, and 2nd

- top weaning weight heifer of the entire crop was by Optics.
- Optics' daughters are very tight uddered with a small teat size, which is certainly a good indication that his daughter's udders will last well into old age. His EPDs reflect this superior teat size and suspension.
- Before we purchased Optics, we saw his dam, grandam, and great grandam, and were impressed with each generation. His grandam has earned Pathfinder honors, and his 2nd, 3rd, and 4th generation dams have all served as donors for Raml Cattle. His great grandam was still going strong at 12 years of age. She is a beautiful uddered, excellent footed, smooth walking female.
- Optics weaned at 812 pounds, WR 112, YW 1420 lbs., YR 113, and had a 41 cm scrotal. He is wide based, thick, smooth shouldered, and offers the frame and stretch that is hard to find in the breed today. Optics quickly froze over 500 units of semen as a yearling bull before turn-out.
- Owned with Cattle Visions, Clark, MO; Panther Creek Ranch, Bowen, IL; Raml Cattle, Goodwin, SD; and Genetics Unlimited, Bloomfield, IA.

ERICA OF ELLSTON T220

DAM OF HOOVER CHOICE

- Hoover Choice is a maternal brother to Alta Genetics' lead-off sire, Bold Ruler!
- Choice is a very good temperament, well-rounded sire from the most famous Hoover Angus cow – Erica of Ellston T220. T220 sold at 8 months of age, and she has been wildly successful for her owners! High-profile programs from across the country now have T220 daughters in their donor line-ups.

• From just a small crop of calves his first year, one Choice son was a photo feature in our 2025 sale. Progeny of Choice will sell in our February 3, 2026, sale as well as heifers carrying his service.

- Pathfinder donor grandam R96 is a third consecutive generation Pathfinder donor cow. She serves as the 7th top indexing cow of the Hoover herd with a superior 6-109 wean ratio on her progeny! Her 7 daughters to sell at Hoover Angus have averaged \$21,450!
- Pathfinder donor great grandam M38 is the highest indexing daughter of G366, the cow regarded as the best cow in our 98-year history! M38 was at one time the #1 indexing cow of the Hoover herd with the tremendous growth she put into her calves. She served as a working donor until 11 years of age.
- At 10 years of age, M38's progeny and grand progeny led off our 2023 sale catalog and included the 2nd and 3rd top-selling bulls!
- The Ericas have been a dominant force of our top-end genetics for many years. They have proven themselves the hard way – the old-fashioned way – by progeny performance and success. Six of the past 8 years, sons of the Ericas have been the Lot 1 bulls in our sales. In our 2021 auction, of the 8 animals that hit the \$20,000+ price tag, 6 of them were from the Erica cow family.

- Entice yearling bulls topped our 2022 sale, averaging \$9141 on 16 sons! Entice progeny are unparalleled for excellent disposition, growth, and length of body with more frame than offered by most cattle in the Angus breed today. Progeny have excellent thickness, style, and a commanding presence!
- When we were at the height of Entice progeny in a calf crop, we

ERICA OF ELLSTON A32  
\$15,000 ENTICE DAUGHTER

UDDER OF MISS ERICA ELLSTON A72  
TWO-YEAR-OLD ENTICE DAUGHTER

- noticed there were bulls that "filled the chute" wide-wise. Almost every single time, these bulls are sired by Entice.
- We weaned over 70 Entice calves in his first calf crop, including the #1 adjusted weaning weight bull AND heifer. Each calf crop has been equally impressive and very well-received by our customers. Now, Entice daughters carry the torch – in our spring 2025 calf crop, Entice daughters weaned the #1 adjusted weaning weight bull and #1 adjusted weaning weight heifer! Over 800 daughters average a 102 wean ratio on their progeny.
  - Entice progeny scan well too, with over 1300 progeny at 103 IMF ratio and 100 ribeye ratio with below average fat ratios.
  - Entice offers a correct skeleton and exceptional phenotypic presence in a mid-6 frame. He is wide based, super long, big ribbed, square hipped, tight sheathed, and has abundant thickness. Entice exhibits superior foot shape, and we see this in his progeny too – Entice is a proven breed improver for foot shape and ideal foot angle. You can improve testicle size in one generation using Entice too.
  - Entice was the \$42,000 top-selling bull in the 2018 Mogck & Sons sale. Entice's Pathfinder dam records 7-104 WR, 7-103 YR, 7-111 IMF ratio, and 7-102 ribeye ratio. Her five sons have averaged a 792 pound weaning weight.
  - Entice had a very solid set of performance data: BW 77 lbs., WW 886 lbs., WR 116 among 216 contemporaries, YW 1544 lbs., YR 114, IMF 4.94, ratio 118, ribeye 17.0", ratio 114.
  - Owned with Mogck & Sons, Olivet, SD and Select Sires, Plain City, OH.

## REALISTIC & RELIABLE EPDS START WITH PHENOTYPIC DATA

As our breed churns generations faster, we are reminded how important actual phenotypes are. At Hoover Angus, we believe genomics exhibit their full potential only when paired with the accurate collection and submission of phenotypic data – the foundation for realistic and reliable EPDs.

The chart above demonstrates Hoover Angus' commitment to the constant improvement of beef cattle genetics and making genomically-enhanced EPDs the most accurate they can be. Hoover Angus was one of only 20 herds in the nation to receive the inaugural Data Driven GOLD Award from the American Angus Association for data collection.

Our February 3, 2026, genetics offering will feature 185 lots of bulls, spring and fall bred heifers, and open heifers from our performance tested, Maternal Plus® herd. Visit [www.hooverangus.com](http://www.hooverangus.com) or call Landi at 641-344-7684 to request a copy of our sale book.
