### SEMEN: \$30 - CERTIFICATES: \$100

#### Volume Discount Eligible

- Hoover Hawkeye, the Number 1 \$B son of the \$192,000 Mogck Bullseye in the American Angus Association database as of the Spring 2015 update, was selected by Three Trees Ranch as the top-selling bull of the 2014 Hoover Angus sale and he has been used quite extensively in both programs with his first calf crop eagerly awaited as of this writing.
- For the second year in a row, when you set Hawkeye's BEPD as a maximum value and his WEPD, YEPD and Docility EPD along with his RE EPD as minimum values, Hawkeye is the only ONE of nearly a quarter of a million bulls that meets those criteria!
- The result of 85 years of dedicated Angus breeding, backed by 11 generations of Blackcap Ellston females produced by four generations of the Hoover family, Hoover Hawkeye has cleared every hurdle that can be placed in front of a yearling Angus bull with flying colors with an actual birth weight of 65 pounds as a heifer's first calf, an adjusted weaning weight of 844 pounds for a ratio of 111, an adjusted yearling weight of 1,505 pounds for a ratio of 110, an IMF ratio of 109 and an EXCEPTIONAL adjusted yearling URE measure of 19.1 square inches for a ratio of 119 to complement his elite HD50K percentile rankings.
